seven SAARC countries have ratified the Agreement by the first week of November, 1995. The tariff concessions agreed in the first round under the Agreement will become operative from 7.12.1995.

(b) and (c) Full implementation of SAPTA will require extension of tariff concessions, to all product lines. In the first round of negotiations, concessions have been extended to only a few tariff lines. With further expansion of tariff concessions under SAPTA in future rounds of negotiations intra SAARC trading opportunities arc likely to be enlarged. The extent and depth of concessions will also be determined during the negotiations. It is, therefore, not possible at this stage to quantify the likely increase in trade as a result of full implementation and also how much of the increase will represent additionality in trade. Consequently, loss of anticipated revenue as a result of full implementation of SAPTA cannot be determined at this stage.
